ORTHOPAEDIC MATTRESS

## Presenting Orthopaedic Mattress from Rubco

One of the most common causes of backache is improper sleeping postures, made worse by mattresses that offer inadequate back support. Rubco's new Relief Orthopaedic Mattresses are scientifically designed to maintain the natural 'S' shape

of your spine even while you sleep. They are firm without being hard and do not sag, thus providing proper support to the body.

Relief mattresses are manufactured in a state-of-the-art, computer controlled plant imported from DOA, Austria. The DOA sheet foaming machine has the unique advantage of producing uniform density vertical oriented fibre sheets. Vertical Fibre Orientation (VFO) ensures extra cushioning effect and high durability in the mattresses. Relief mattresses are also resilient and extremely comfortable. The upholstery, made in computer controlled machines imported from U.K. and U.S.A., adds to the comfort and superior finish of Relief mattresses. Manufactured to the highest quality standards, Relief Orthopaedic Mattresses offer perfect back support without compromising on sleeping comfort.

So, if it's backache that's troubling you, Relief orthopaedic mattress is just what the doctor ordered. Get one today and discover how restful and comfortable sleep can be.

Visit your nearest Rubco mattress dealer (The Eco Bed House) today.
